EDUCATION

B.Tech(Software Engineering)	2023-2027	Delhi Technological University, New Delhi	9.15
CBSE (Class XII)	2022	RPVV, Gandhi Nagar, Delhi-31	94.4%
CBSE (Class X)	2020	RSBV, Gandhi Nagar, Delhi-31	94.6%

INTERNSHIPS

ML Research Intern | Machine Learning Research Lab, DTU **June 2025 – December 2025**

- Conducting advanced research on action recognition in low-light environments on datasets ARIDv1.5 and Dark48.
- Aiming to achieve over 94% classification accuracy and >5 dB PSNR improvement over raw inputs.
- Implemented and evaluated 4+ state-of-the-art models for low-light image and video enhancement, including OwlSight, Zero-DCE, HVI-CIDNet, and DGAM, using PyTorch.

ACADEMIC PROJECTS

Twitter Sentiment Analysis | LINK | Python, Pandas, Scikit-learn, NLTK, Streamlit

- Built a sentiment classification model with 80%+ accuracy by NLTK & Scikit-learn on a dataset of 1.6M tweets.
- Engineered a data pipeline to stream live tweets via the Twitter API v2 with Bearer Token authentication to capture 100 tweets per minute, providing insights to identify the top 5 emerging positive/negative tweets of users - [DEMO].
- Benchmarked 4 ML models (Logistic Regression, XGBoost, SVM, Naive Bayes) and deployed a Streamlit dashboard.

Snap Bucket – Grocery App| LINK | React.js, Express.js, MongoDB, JWT, Tailwind CSS

- Crafted a full-stack grocery web application using the MERN stack, featuring 10+ functionalities such as login, product listing, real-time search filtering, order placement, and address handling.
- Built a shopping cart system with live item quantity updates, subtotal calculations, and local Storage sync.
- Prototyped secure login with JWT-based authentication and cookie-based session management for 100% protected user sessions, integrated with MongoDB Atlas and Render for deployment.

U&I Chat – Realtime Chat Application | LINK | MongoDB, Express.js, React.js, Node.js, Socket.io

- Architected a MERN-based real-time chat application using Socket.io for instant messaging, React.js for frontend UI, and Node.js, Express backend, achieving <200ms message delivery latency.
- Implemented secure user authentication with personalized message history and upload image feature(<50KB).
- Deployed frontend and backend services using Render and MongoDB, ensuring high availability and scalability.

ACADEMIC ACHIVEMENTS

- Demonstrated strong academic excellence with a consistent 9+ CGPA over 4 consecutive semesters.
- Achieved Expert at Codeforces (Max. 1607, handle- CodingKnights), Knight at Leetcode (Max Rating: 1910, username- Aman_Jain_27) and 3 stars at CodeChef (Max. 1626, handle- amancoding5581).
- Solved over 1000+ problems across Leetcode, CodeChef, Codeforces and GeeksforGeeks.
- Finalist for the offline round among the top 20 out of 500+ teams in Code with DCG Hackathon – [PROJECT LINK].
- Earned OCI AI Foundations Associate certification from Oracle University, demonstrating proficiency in AI concepts.

TECHNICAL SKILLS

Languages	Frameworks/Libraries	Tools	Coursework
C/C++, JavaScript, C#, Python, HTML, SQL	Pandas, NumPy, Tailwind CSS, MERN, Scikit-Learn	GitHub, Google Colab, Jupyter, Postman, SonarQube, Lighthouse	DSA, CN, DBMS, OOPs, OS, TOC

POSITION OF RESPONSIBILITY

- Corporate Head, LFC Cultural Fest Society, DTU – Spearheaded sponsorship acquisition by initiating corporate relationships, negotiating deals and led a team of executives for the fest Yuvaan.
- Orchestrated logistics at major hackathons including Character On Road and Smart India Hackathon at DTU managing 400+ participants to ensure seamless event execution.
